About 1.3 million families are estimated to be landless in Nepal

**Achievements**

- Identified 15,127 landless and 74,718 informal settlers in 13 local governments
- Validated 21,267 collected data through digital system
- Land survey of 21,267 parcel of land has been completed
- Contributed for localization of land governance and land use planning
- Ensured strong documentation of landless and informal settlers at local government
- 45,206 families received temporary evidence from local governments

**Process**

- Meeting with local government
- Development of detailed work plan
- Orientation for local representatives on the scaling process and procedures
- MoU among main actors
- Development of Questionnaire
- Orientation for Enumerators
- Formation and mobilization of facilitation committees at municipality and ward levels
- Approval and dissemination by council assembly
- Review and final data base
- Data validation through public hearing
- Data entry, validation and update in digital platform
- Data collection at household level and satellite mapping
- Orientation at ward level

**Possibility of Scaling up**

Possible to scale up the IVR in all local governments.

National Land Commission (NLC) applying same methodology and processes to distribute land to the landless and informal settlers.

**Added value**

- Selection of the right impact group
- Meaningful participation of impact group in law making
- Multi-stakeholder participation
- Increased transparency and accountability
